

Recycling silage wrap is easy:

1. Separate the net, shake off excess silage and moisture

2. Roll the wrap into a football

3. Push down tightly into a green Plasback liner

4. Tie off when full and remove bin

5. Stock pile (out of weather if possible)

6. Drop at local transfer station

Silage pit covers can only be accepted for drop off in a Plasback "Silage Wrap Only" green printed recycling liner.

The method outlined below maximises the amount you can get into a liner. It is important to ensure loose silage has been shaken off the cover before folding. A pit cover section of up to 10m x 15m will fit in one Plasback liner once properly folded and rolled. See below..

10m section of Silage pit cover

Fold in Half

Fold in Half Again

Fold in Half Again

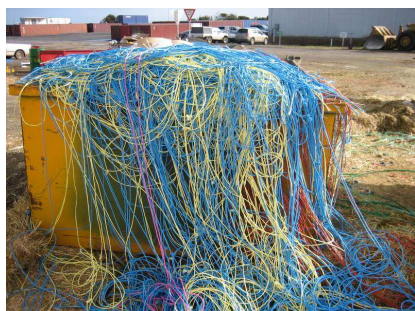

Rolled up silage pit cover

25kg section in liner

Twine liners are the same size as the "Silage Wrap Only" liners, but have red writing on them and are clearly labelled "Twine only". No other plastics should be put in these liners or they will be rejected at the drop off sites.

SILAGE WRAP AND TWINE DROP OFF SITES

Kiama Municipal Council Recycling Depot at 446 Riverside Drive Minnamurra on the first Monday of each month in conjunction with the drumMUSTER program. (Open 8 am to 4 pm - 02 4237 5148 or see www.kiama.nsw.gov.au)
