Kiama

**Groundcovers**

**Brodiea multifida** - Pita Leaf Leaf
This is a vigorous, low spreading evergreen. Masses of pink flowers are held above the red leaf from July. (1) 75cm sq. Full sun to part shade. Most soils.

**Obatia repens** - Yellow Rocket
Leaves shiny to grey-green, somewhat hairy. Flowers bright yellow in dense spikes in spring to summer. (1) 15cm x 30cm. Full sun, full shade. Most well-drained soils.

**Meyendorfia hortorum** - Grey Ground Cover
Hairy ground cover with deep green grey foliage with white or pink flowers in spring and autumn. (1) 30cm. Full sun, full shade. Most well-drained soils.

**Rheostates australis** - Chamois Luck
Wiry stems with grey-green leaves. In autumn and winter, white flowers in clusters. (1) 30cm x 30cm. Flowers spring to mid winter, full sun, part shade. Well-drained soils.

**Scaevola aemula** - Fairy Fan Flower
Emerges parasitic with a pretty habit. Pale pink flowers. (1) 30cm x 60cm. Flowers spring to autumn, full sun to semi shade. Most well-drained soils.

**Plectranthus** - Nepeta Violets
Small creeping plant. White flowers with purple centres. (1) 30cm x 30cm. Flowers during warm months. Full sun to half shade. Most soils.

**Native Planting**

- Add value and beauty to your property
- Reinforce your garden
- Adapt well to your area
- Enhance the historical nature of the region
- Need less water than many introduced species
- Provide excellent and interesting wildlife habitat
- Create native fauna in your area
- Increase with the surrounding land
- Provide habitat for the preservation of wildlife

This is just a small selection of native species suitable for the home garden and available from most garden centres. It is essential to water and feed these plants until they are well established. Plants only become drought resistant once they have developed a high-quality root system.
